

SPRINTER CARGO VAN (2007-2018) WINDOW-CAVITY DOOR PANELS INSTALLATION INSTRUCTIONS

Before Beginning the Installation

1. Make sure the box contains all parts listed in the “BILL OF MATERIALS” on the back side of this sheet.
2. Refer to the “VISUAL PANEL REPRESENTATION” section on the back side of this sheet when following the installation instructions below.
3. Install the plastic panels so that the textured side is visible.

Install Sliding Door Panel DVS030

1. Using one of the adhesion promoter pads supplied in the kit, wipe the areas of the sheet metal specified in **Figure 1**.
2. Peel the red strips off the tape on the back of the **DVS030** panel and discard them.
3. Center the **DVS030** panel in the window cavity of the sliding door and stick the panel to the sheet metal. **NOTE:** Apply pressure to the panel in the areas shown in **Figure 1**.

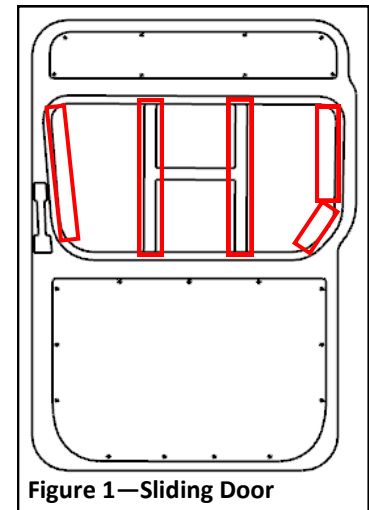

Figure 1—Sliding Door

Install Rear Door Panels DVS028 and DVS029

1. Using the adhesion promoter pads supplied in the kit, wipe the areas of the sheet metal specified in **Figure 2**. **NOTE:** Use one pad for the driver side door and one pad for the passenger side door.
2. Peel the red strips off the tape on the back of the **DVS028** panel and discard them.
3. Center the **DVS028** panel in the window cavity of the rear door on the driver side of the van and stick the panel to the sheet metal. **NOTE:** Apply pressure to the panel in the areas shown in **Figure 2**.
4. Peel the red strips off the tape on the back of the **DVS029** panel and discard them.
5. Center the **DVS029** panel in the window cavity of the rear door on the passenger side of the van and stick the panel to the sheet metal. **NOTE:** Apply pressure to the panel in the areas shown in **Figure 2**.
